escape 20 is the most recent in a series of conferences that serves as a forum for engineers scientists researchers managers and students from academia and industry to present and discuss progress being made in the area of computer aided process engineering cape cape covers computer aided methods algorithms and techniques related to process and product engineering the escape 20 scientific program reflects the strategic objectives of the cape working party to check the status of historically consolidated topics by means of their industrial application and to evaluate their emerging issues includes a cd that contains all research papers and contributions features a truly international scope with guest speakers and keynote talks from leaders in science and industry presents papers covering the latest research key topical areas and developments in computer aided process engineering cape

k warner schaie i am pleased to write a foreword for this interesting volume particularly as over many years i have had the privilege of interacting with the editors and a majority of the contributors in various professional roles as a colleague mentor or research collaborator the editors begin their introduction by asking why one would want to read yet another book on human development they immediately answer their question by pointing out that many developmentally oriented texts and other treatises neglect the theoretical foundations of human development and fail to embed psychological constructs within the multidisciplinary context so essential to understanding development this volume provides a positive remedy to past deficiencies in volumes on human development with a well organized structure that leads the reader from a general introduction through the basic processes to methodological issues and the relation of developmental constructs to social context and biological infrastructure this approach does not surprise after all the editors and most of the contributors at one time or another had a connection to the max planck institute of human development in berlin whether as students junior scientists or senior visitors that institute under the leadership of paul baltes has been instrumental in pursuing a systematic lifespan approach to the study of cognition and personality over the past two decades it has influenced the careers of a generation of scientists who have advocated long term studies of human development in an interdisciplinary context

within this volume the rapid evolutionary changes currently pervading all telecommunication fields are explored changes in teletraffic technology such as from analog to digital from dedicated systems to service integrated networks insure a steady increase in teletraffic research activities in the near future included

in the over 1000 pages of high quality research reports are six in depth workshops organized by renown experts in the fields of atm stochastic modelling systems engineering and traffic engineering future telecom scenarios teletraffic problems of developing countries and history of teletraffic keynote speakers were given the opportunity of first choices among the papers submitted ensuring excellent quality among the papers included
